Domain	Level 0 warm-up

Synthetic demo excerpt (written by the organisers - NOT a quotation)

SYNTHETIC DEMO TEXT (written by the organisers, not quoted from any paper). A dictionary of words can be stored as a tree in which words that begin with the same letters share the same path from the root, so each shared beginning is stored only once.

Inspired by / further reading: Fredkin (1960), Trie Memory, Communications of the ACM 3(9):490-499. The real paper does not contain this text.

Notes: record the page or section for every claim you make about this paper.
